ABOUT

I hold a **B.Sc. in Computer Science** and Geology from Ben-Gurion University, as well as a graduate certificate from the **AI Developer program** at Reichman University in collaboration with Google. I am a Full-Stack developer with hands-on experience building end-to-end projects, with relevant work available on my GitHub. My projects include Autonomous Robot Mapping Simulation and a Vehicle Track Detection System.
 Fast-paced team experience, including UI testing and leadership roles. Highly motivated self-learner focused on software development, with hands-on experience in various academic and personal projects.
